SUMMARY

Frontend-focused fullstack developer building products for African contexts — solutions that already exist globally but not yet locally. Experience spans fintech, prediction markets, edtech, and civic/community platforms, with hackathon wins and shipped production features across React/Next.js frontends and Node.js/Postgres backends.

EDUCATION

Obafemi Awolowo University (OAU), Ile-Ife, Nigeria Expected 2029
B.Sc. Computer Science

PROJECTS

IfáQuant — Team Àjé

Sole Frontend Engineer

- Built a Bloomberg-style prediction market terminal for African markets across five modules (Dashboard, Quant Lab backtester, Ifá Oracle AI chatbot, Portfolio Terminal, Saved Alpha), with live Bayse Markets API integration and Vertex AI/Gemini-powered signals.
- Won the BWAI × OAU Hackathon and advanced to the People's Choice Award round.
- Fixed a signal-calibration bug, added a USDNGN macro sensitivity filter, and authored the project's pitch deck and technical README.

Verta

Frontend Developer

- Built the frontend for an AI diagnostic platform helping Nigerian secondary school students choose academic tracks and navigate university admissions, on a 6-person team in a 2.5-day hackathon sprint (JCI/GDE Hackathon).
- Shipped the unified 3-section quiz interface, level-confirmation screen, and results/course-profile pages; implemented frontend logic for a single-take identity lock. Stack: React/Next.js, Node/Express, PostgreSQL (Neon), Gemini 2.5 Flash.

CrunchTime

Founder / Product & Engineering

- Designing an AI-powered study platform converting uploaded course materials and past-question patterns into personalized exam prep plans, cheat sheets, and adaptive drills.
- Authored a full PRD covering a three-layer prediction system (topic, format, question level), a tiered confidence model, and a weekly scheduling engine balancing multiple concurrent courses.

Starlight Pay

Frontend Developer

- Built the landing page for a bill-payments app supporting electricity, subscriptions, airtime, and data purchases.

NACOS OAU Website

Volunteer Frontend Developer

- Contributing to the frontend of the OAU chapter's association website (Next.js 16, React 19, Tailwind v4, shadcn/ui, TanStack Query, Auth0).
- Shipped skeleton loaders and an animated dues chart, implemented a blue-tick verification system, and completed a technically complex rebase of the dues feature.

SKILLS

Frontend: React, Next.js, Tailwind CSS, shadcn/ui, TanStack Query

Backend: Node.js, Express, PostgreSQL, Prisma, REST APIs, JWT / Auth0

AI / Data: Gemini API, Vertex AI, RAG pipelines, Supabase/pgvector

Tooling & Platforms: Git/GitHub, Vercel, Render, Neon, pnpm

LEADERSHIP & INVOLVEMENT

Active member, NACOS OAU (Nigerian Association of Computer Science Students)

Active member, GDG OAU (Google Developer Groups)
